

Student Achievement Center

Shelbyville High School is Making it Happen!

WE ARE an alternative learning program located in Shelbyville, Indiana. We work with approximately 75 Shelbyville High School students each year to provide the opportunity to earn high school credits and their diploma. Our motto is: Every student. Every day. No exceptions. No excuses.

OUR STUDENTS are Shelbyville High School juniors and seniors with 20 or more academic credits towards graduation.

OUR TEACHERS work with students individually to create plans designed to help students be academically successful and graduate from high school.

OUR PROMISING PRACTICE is that we provide an opportunity for students to learn and earn high school credit in a different setting from the traditional high school. Students are identified and placed in the program by a committee consisting of administrators, guidance counselors, and teachers. Factors that influence placement might include: the student is a parent or expectant parent, the student intends to withdraw from school, or the student has not been academically successful in the past and is considered at-risk for graduation. All students in the program work on online curriculum to earn credits, as well as participate in additional programming (such as vocational classes, Jobs for America's Graduates classes, Career Information and Exploration classes, Career Internships, and Community Service).

OUR STEPS are that we spend significant time tracking student data, which is used to make improvements to the program's implementation. Collaboration with other programs and educators helps introduce new ideas and improvements.

IN OUR OWN WORDS The Student Achievement Center has helped Shelbyville High School have a graduation rate of 90% or higher for the past several years! Students go on to college, military service, or enter the workforce upon graduation. Many students say that they likely would not have graduated without the Student Achievement Center's alternative programming. Additional information about our online learning curriculum, Apex Learning, can be found here: www.apexlearning.com
